

New, Easier-to-Use Online Service Schedules

Dear Valued Customer,

Pacer is pleased to introduce our new easy-to-use online service schedules. The new schedules enable you to view all of Stacktrain's intermodal service options sorted by origin and then by destination markets.

You can view the new schedules by going to www.pacerstack.com. From the Pacer Stacktrain Home Page click on Schedules within the Directory Services menu, then on Pacer Stacktrain Schedules On-Line. There are three options for viewing schedules:

Option 1): an Excel worksheet version enables you to rapidly filter by origin and destination pairs so you can view all available ramp-to-ramp options.

Option 2): a .pdf file enables you to print a handy list sorted by all origin markets which are then sorted by destination markets.

Option 3): a .pdf file enables you to print a list of all Pacer Expedited service options.

Customers with a password secured sign-in can now also view schedules integrated with FAK rates by equipment size and service level descriptions.

Please contact your Sales or Customer Support Representative with any questions. You can also send an email to marketing@pacer.com with specific questions on how to use this new schedule viewing functionality.

We appreciate your understanding and support.
