Upgrades to Stacktrain's Operating Systems Scheduled for Sunday, May 18, 2008

Dear Valued Customer,

As part of our regular upgrading of mainframe operating systems we are scheduling an extended outage of the global production environment. The outage is scheduled for Sunday, May 18, 2008 and is expected to last 12 hours, from 4:00 AM to 4:00 PM CT.

All inbound and outbound EDI will be on hold during this time; websites for gate and equipment reservations as well as our shipment order tracking will be unavailable; and our interactive voice response system for container tracking will not be updated. The systems are scheduled to resume operation after 4:00 pm on May 18. After resuming operating capability, the systems will require time to run EDI and batch processes before the website and voice response systems can be updated. We anticipate normal utilization to return by Monday morning.

Our Rail Billing Center will be staffed from 10:00 am to 10:00 pm CT on Sunday, May 18 to assist with billing issues. The phone number at our Rail Billing Center is 800-684-4070. Rail billing will not be accepted while the system is down. We strongly recommend rail billing for loads moving on Sunday, May 18 to be completed prior to 10:00 pm CT on Saturday, May 17.

We apologize for any inconvenience this brief outage causes, but the result will be greater performance and reliability in the data systems that link us to you. As always, we want to thank you for your business, and for your understanding as we endeavor to improve the quality of the services that we offer.

If you have any questions regarding this notice, please feel free to contact your Pacer Stacktrain Business Development representative or our Customer Support group.

We apologize for any inconvenience, and as always, we appreciate your business.
